

Sensational Science Show

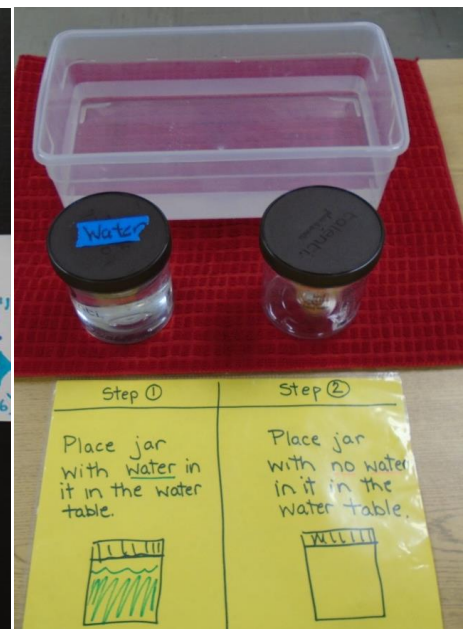

Kindergarten Enrichment Scientists invited family and friends to their Sensational Science Show. After a 10 week study, family and friends were able to participate in live experiments and view a variety of exhibits. The show included a Human Body Lab, Water Lab, and Zoology Lab. Scientists posed questions and asked family and friends to make predictions. Here are just a few...

- **How long is your digestive system?**
- **How much saliva do you produce in a day?**
- **Why do we need a skull?**
- **How many times does your heart pump in a minute?**

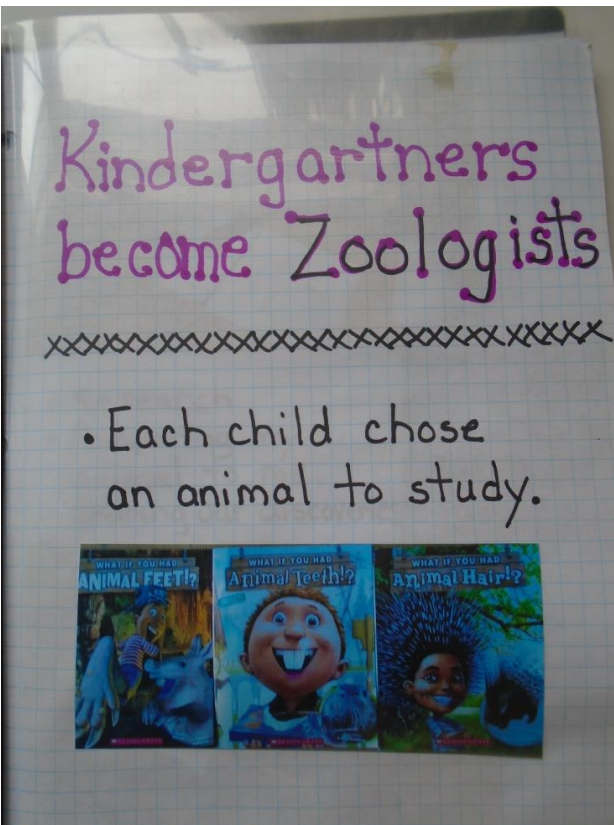

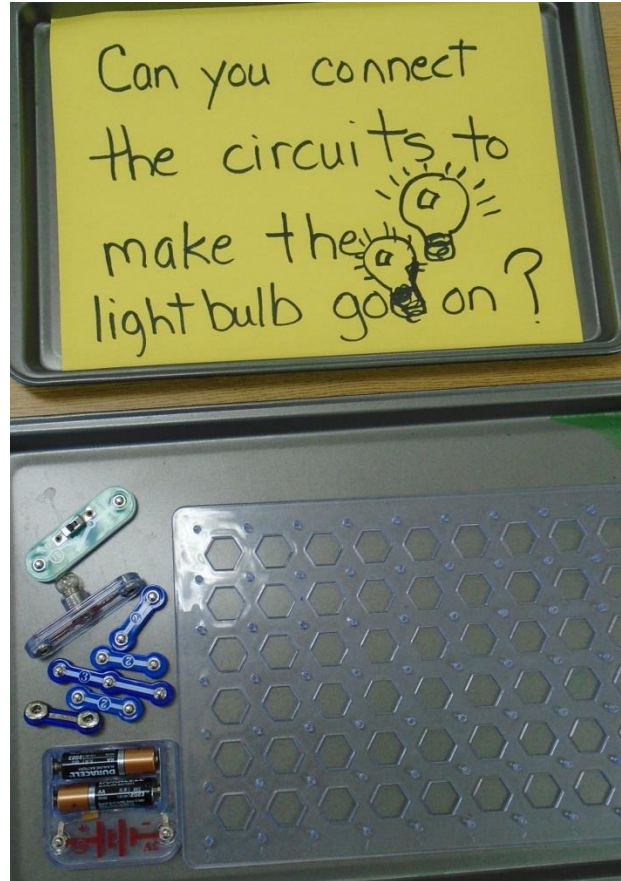

- **How many droplets of water can you fit on a penny?**
- **What happens if you push water droplets together?**
- **Why do boats float?**

Sensational Science Show

- Which electricity is manmade?
- Which electricity is natural?

- What does the word camouflage mean? How many worms can you find?
- What animal is it?
- What is an x-ray? What is hidden underneath the animal's skin or fur?
