

Lunch and Learn...

is a collaborative experience where children will develop skills to play, eat, and learn with a group of friends.

Play

Children play outside on our playground and inside in our gym with their classmates from all classes. They have the opportunity to make new friends and develop relationships. Our gross motor equipment fosters imaginative, cooperative play.

Eat

After gross motor play, the children have lunch. This gives them an opportunity to use their language. They converse with the other children and teachers, use their manners, and develop independence.

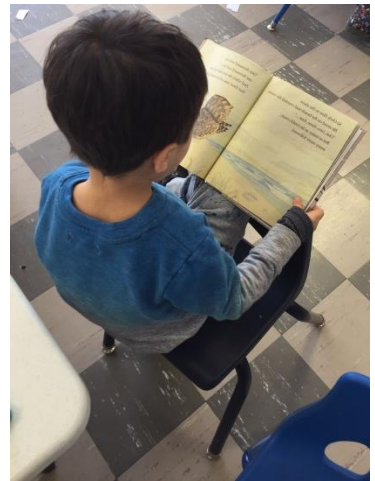

Lunch and Learn

Learn

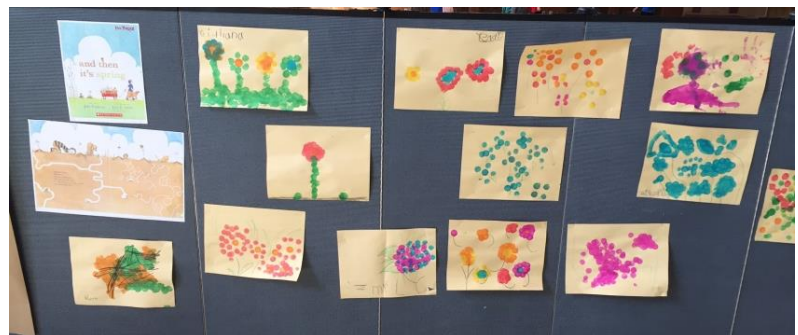

The learning portion is designed so that children have the opportunity to grow their language, social, cognitive, and physical skills. Each theme incorporates language arts, math, science and/or social studies, visual and performing arts, physical, and social and emotional development. Here are some examples of activities from the Nocturnal and Spring Unit.
