

Autumn has been a wonderful time for a Pumpkin Study in our 3 year old program!

We cut our pumpkins to explore what was inside! Look what we found....lots and lots of seeds.

We painted pumpkins and added all the things found inside real pumpkins.

Pumpkins, pumpkins everywhere! From stained glass pumpkins to pumpkins with faces our students had lots of fun learning about pumpkins!

We each got our own pumpkin and planted seeds inside. We have taken our pumpkin plants home.
